

Report on Health Awareness Programme

Date: 21st April 2026

A health awareness programme was conducted on 21st April 2026 at Vedantaa Institute of Medical Sciences, Dahanu, in coordination with the Panchayat Samiti, Dahanu, and associated government departments.

The programme was organized as part of a public health initiative aimed at promoting awareness regarding sanitation, hygiene, and preventive healthcare practices among the community.

The event was attended by healthcare professionals, faculty members, and officials from various departments. Important topics related to community health, disease prevention, and available government health services were discussed in an informative and accessible manner.

A total of 212 participants attended the programme, demonstrating active community participation. The session included interactive discussions, allowing participants to ask questions and address their concerns.

The programme was successfully conducted with the support and cooperation of all departments and concluded with a positive response from the attendees. It played a significant role in enhancing awareness and encouraging better health practices among the community.
