REPORT ON ACHIEVEMENT AT CID 2026 – NATIONAL CONFERENCE ON CHALLENGES IN DIABETES

Participant: Dr. Raj Sachin Patil
Designation: Junior Resident – III
Department: General Medicine
Conference: CID 2026 – A National Conference on Challenges in Diabetes
Date: 26th – 27th June 2026
Venue: JW Marriott Sahar, Mumbai
Presentation: Oral Paper Presentation
Award: 2nd Prize

Introduction

Dr. Raj Sachin Patil, Junior Resident – III, Department of General Medicine, Vedantaa Institute of Medical Sciences, Dahanu, participated in CID 2026 – A National Conference on Challenges in Diabetes, held at JW Marriott Sahar, Mumbai, from 26th to 27th June 2026. The conference provided an academic platform for clinicians and researchers to discuss contemporary challenges in diabetes and related metabolic disorders, with emphasis on evidence-based clinical practice and improving patient outcomes.

E-Paper Presentation

Dr. Raj Sachin Patil presented an oral paper titled:

"*Clinical Profile of Stress Hyperglycemia in Medical Intensive Care Units*"

The study focused on stress hyperglycemia among critically ill patients admitted to Medical Intensive Care Units (MICUs) and highlighted its clinical significance as an indicator of disease severity and patient outcomes.

Key Findings and Message

The work highlighted that stress hyperglycemia is present in approximately one in four critically ill ICU patients without previously known diabetes. It was identified as an important marker of increased disease severity and was independently associated with significantly higher in-hospital mortality.

The presentation emphasized the importance of:

* Early identification of stress hyperglycemia in critically ill patients.
* Routine monitoring of blood glucose in ICU admissions.
* Prompt recognition and appropriate management of hyperglycemia.
* Considering blood glucose as an important parameter in the initial evaluation of every ICU patient.
* Recognizing stress hyperglycemia as a potential prognostic indicator in critically ill patients.

Achievement

Dr. Raj Sachin Patil was awarded the 2nd Prize in Oral Paper Presentation for the research work “Clinical Profile of Stress Hyperglycemia in Medical Intensive Care Units.”

The achievement reflects the academic and research efforts of the Department of General Medicine and brings recognition to Vedantaa Institute of Medical Sciences, Dahanu at the national-level academic forum.

Conclusion

The participation and achievement of Dr. Raj Sachin Patil at CID 2026 demonstrate the institution’s commitment to encouraging research, academic excellence and scientific presentation among postgraduate residents.

The recognition of the research work with the 2nd Prize in Oral Paper Presentation is a noteworthy academic accomplishment and serves as an encouragement for further research and scholarly activities among residents and faculty members.

CERTIFICATE
OF ACHIEVEMENT

CID 2026
THE GLOBAL DIABETES EXPEDITION

This is to certify that

Dr. Raj Sachin Patil

has been awarded **2nd Prize** in **Oral Paper** presentation for the paper Titled: Clinical Profile of Stress Hyperglycemia in Medical Intensive Care Units at CID 2026, held on 26th & 27th June, 2026 at JW Marriott Sahar, Mumbai.
